

Problem Statement

***Consensus
Reached***

The transportation infrastructure in the center of New Boston is no longer adequate for the increased volume of local and through traffic (commercial/residential); the range of users; multiple modes of travel; and land use patterns. The layout of the transportation infrastructure and increased volume of traffic negatively impact the safety, access, aesthetics, connectivity, environment, tranquility, sociability, and rural character of the Village. There is a lack of safe contiguous well-defined facilities for those wishing to access the area's business, recreational, institutional, and historical resources.
